## COURSE DESCRIPTION

Enrollment in this course is restricted to graduate students in the MLIS program. This course is designed to introduce students to the professional principles and practices that guide professional archival work. Weekly readings will acquaint students with the scholarly and professional literature. Students will gain a solid grounding in the history of the profession, an understanding of basic archival terminology, principles, theory, as well as an appreciation of current practices and how digital technologies have impacted both archival management and public programming. **Class sessions will be in-person and primarily lecture driven.** Please note that should a COVID surge demand unforeseen restrictions, the instructor is prepared to move the class to an online environment.

## Course Objectives

1. To understand the nature of archival documents, as recorded information;
2. To understand the principles of archival science in contrast to those of related disciplines;
3. To explore how archivists acquire, appraise, arrange, describe, preserve and promote archival materials and make them available for use;
4. To consider the management issues involved in implementing archival principles and practices in an institution.

## Course Requirements and Grading

**Readings:** There are no required texts, but there will be reading assignments as indicated on the course website. Readings will be available as on-line resources on the course website or, as indicated, posted on OWL.

**Required Assignments:** Students must submit one major essay over the course of the term, a critique on an exceptional archival outreach resource (i.e. digital exhibit), and three practice-based exercises on applying learned principles of archival appraisal, arrangement/description, and reference services respectively. Late assignments will be penalized at a rate of 2% per day.
